- Full-service, full maintenance leases
- Lease options with market value and pre-determined buyouts
- Straight equipment leases
- Long term and short term leases
- Conditional sales agreements
- Sale/Leaseback

MOVING FORWARD

LEASING

The NRE lease fleet meets the needs of Class-I railroads, short line carriers and industrial customers. The fleet make-up includes a composite of four axle and six axle locomotives ranging from 18 ton per axle general purpose units to 34 ton per axle special duty locomotives. Locomotive power availability ranges from 500 horsepower per unit to 3,600 horsepower per unit. NRE leasing representatives take the time to design lease programs and conditional sales agreements to fit the budgetary needs of each individual customer.

LEASING FLEET
